# AI JOB MARKET INSIGHTS

Dataset rows: 15000

Median salary USD: 99705.0

Percent fully remote (remote ratio==100): 32.800000000000004

Most common company location: Germany

Key take-aways

Senior-level (SESE) roles command the widest salary range and the highest medians, while entry-level jobs stay well below 100,000100,000 USD. Executives are few but very highly paid.

Roughly 32.832.8of all advertised positions are fully remote, showing a strong remote culture in AI hiring.

Germany is the most frequent company location, hinting at a vibrant European AI job market.

Top technical skills are dominated by Python-ecosystem tools (e.g. PyTorch, AWS, Docker) plus data-viz staples like Tableau.

What this means

If you are hiring, clarify experience bands because compensation gaps are large.

Investing in sought-after skills (PyTorch, cloud, containerization) substantially improves candidate appeal.

A third of companies already default to 100 % remote, so flexible work policies are now table-stakes.
